

## Group 3

**Moonrock ceremony** – Group 3 were privileged to be part of a community event recognising a significant Aboriginal site as a declared Aboriginal place. We were extended a warm and inclusive welcome by Aboriginal representatives and observed a traditional smoking ceremony performed by KOOMURRI. Guest speakers acknowledged the children of Kinma and the importance of future generations towards reconciliation. We were also invited to enjoy the scrumptious morning tea they provided. The ceremony was not at the actual site and arrangements are being made for Term 2

We have had some considerably hot days and have kept ourselves cool with hoses and water sprays. These hot days made us aware of our personal water intake. How much water (millilitres) do our bottles hold? We ordered our drinking bottles from what we thought held the highest to lowest vessels/containers of water. We then measured our bottles and rearranged in the correct order of highest volume with some surprising results. We later put this data into a column graph for a visual representation of our findings.

The Spiny Leaf insects have been a big hit in the classroom. The children have aptly renamed them 'The Tree Prawns.'

The Narrabeen lakes excursion was great fun! We meandered around the lake: chatting, daydreaming, spotting spiders (St. Andrews Cross) cooling off, eating and returning a lost dog to its very thankful owners.

Michelle, Katie and Group 3
